CBI CERTIFICATE IN CLIMATE RISK

OFFICIAL EXAMINATION CENTRE FOR

Chartered Banker

INTRODUCTION

Managing climate-related risks and supporting the transition to a low-carbon world are amongst our most significant global challenges. Central banks and financial regulators consider the identification, measurement and disclosure of these risks to be a priority. Recognising the strategic importance of this topic, the Chartered Body Alliance have developed their first joint qualification, the Certificate in Climate Risk. First launched in 2021, the Certificate in Climate Risk has been substantially updated for 2022/23 to encompass a wide range of developments in our understanding of climate change and its impacts, the rapidly-evolving policy and regulatory landscape relating to climate risks, and the substantial progress in finance sector practice in addressing climate and broader sustainability risks.

This Study Guide and course have been revised to include:

- The IPCC's most recent assessment of climate science and the impacts of climate change (AR6).
- Policy and regulatory developments at global, regional (EU) and national levels, including new disclosure and stress testing requirements, and emerging international standards.
- Developments in data availability, quality and analytics.
- Evolving finance sector approaches to climate risk governance and management.
- The growth of finance sector alliances and other groups to address climate and other sustainability issues.
